To Date, **seven peer-reviewed studies** using Protandim have been completed.

Two of these clinical studies have been sponsored directly by LifeVantage Corporation and its predecessor, Lifeline Therapeutics. One study showed Protandim increases levels of the antioxidant **Superoxide Dismutase by 30% and Catalase by 54%** while reducing oxidative stress levels by an average of **40% in 30 days or less**. Another study showed Protandim producing a **300% increase in Glutathione** while demonstrating an **1,800% increase** in the effect of the five ingredients combined than in the simple addition of the individual ingredients.

Independent Studies have been completed at **Louisiana State University** and at **Virginia Commonwealth**. The **LSU** study investigated whether Protandim could suppress tumor formation in mice through a dietary approach. At the end of a two-stage skin carcinogenesis, the mice on the Protandim-containing basal diet showed a reduction in both skin tumor incidence by 33% and multiplicity by 57%, compared to those on a basal diet. Although animal study results cannot be extrapolated as results in humans,

“Induction of antioxidant enzymes by Protandim may serve as a practical and potent approach for cancer prevention.”

The **Virginia Commonwealth** study, published in the American Heart Association Journal “Circulation,” demonstrated the ability of Protandim to protect the heart in a laboratory model of pulmonary hypertension in rats. Finding that **“Protandim also prevented the death of heart cells and significantly lowered osteopontin (OPN-1) levels by more than 50%,”** the researcher described the ability of Protandim **“to effectively activate the transcription factor Nrf2, a signal to the cell’s DNA to increase expression of a network of antioxidants, anti-inflammatory, and anti-fibrotic genes.”**

A number of universities have funded their own trials investigating the antioxidant and health-promoting capabilities of Protandim. These include University of Colorado; Denver Health Medical Center; Children’s Hospital, Denver; University of Florida; University of Kentucky; University of Michigan; Louisiana State University; Ohio State University; Vanderbilt University; Glamorgan University Wales; Sahlgrenska University Hospital, Goteborg, Sweden; University of Toronto/St. Michelle’s Hospital, Canada; University Hospital, Brno Czech Republic; and the Mexican Institute of Social Security, Mexico City.

Topics under investigation or in planning stages deal with the alleviation of oxidative stress under the following conditions: altitude sickness, skin cancer, photo aging of the skin, renal failure, osteoarthritis, HIV/AIDS-associated lipodystrophy, pulmonary hypertension, periodontal disease, heart disease, coronary artery bypass graft failure, asthma, Duchenne muscular dystrophy, metabolic syndrome, non-alcoholic fatty liver disease, and optic neuropathy.

“I didn’t feel much till I stopped taking Protandim. Then I noticed my aches and pains return and I didn’t have the energy to finish an average day. I’m back on!”
-Will F., AK

“Protandim is the first product I can honestly say everyone needs!”
-Mark S., UT

“Nothing helps me get up in the morning and feel really ready for my day like Protandim. I wake refreshed.”
-Carol Ann., TX

“My skin has seriously not looked this good for 20 something years! I have been on Protandim for about 5 weeks.”
-Jim B., ID

“Day 3 on the Protandim and I woke earlier than usual, and my shoulders weren’t aching. It’s a keeper.”
-Christi B. SC

Protandim is manufactured exclusively for and distributed by LifeVantage Corporation and its Distributors worldwide.
